Subject Index

Angle
— between subspaces 71, 76
Approximation
— optimal of functional 183
— sum-product 211
Boolean sum 209
Boundary
— condition 98
— discrete 82
— external 82
— inner 82
— full 82
— Lipshitz 91
— with cone condition 94
Characterization
— of spline 22, 45
Compact 52, 58, 243
Convergence
— by system of operators 50
— strong 243
— weak 51, 243
— weak on dence set 50, 243
Cubature
— formula 180
— Sobolev 191
— optimal 180
— on sphere 192
Decomposition
— Cholessky 216
— spectral 226
Defect 103
Discontinuaty
— line 81
— surface 81
— level 82
— localization 81
Domain

— bounded 91
— multi-dimensional 91
Eigenvalue
— problem 217
— — generalized 215
Eigenvector 215
Energy
— operator 1
Equation
— functional on spline 7
Error
— estimate 50, 57
— — for generalized Lagrangian interpolation 58
— — for D^m-splines
— of interpolation 57, 70, 74
Frechet differentiation 7
Function
— Green 117
— discontinuous 82
— squared integrable 10
Inequality
— Schwartz 104
Interpolation
— by point evaluations 13, 15
— by local integrals 14
— at scattered mesh 15, 56
— by B-splines 103
Kernel
— reproducing 27
Lagrangian
— interpolation 58
— set 13
— polynomial generalized 58
Manifold 126
Mapping
— continuous 53
— reproducing 23, 24
Matrix
— Gram 76, 77
— energy 109
— — for vector spline 151
— interpolating 107
— — for vector spline 151
Mesh
— scattered 56
— rectangular 169

— condensation law 80
— tensor 179
Method
— Newton 229
— Chebyshev 229
— condensation 103
— finite element 64
Net
— condensed 91
Normal 137
Operator
— prolongation 139, 244
— interpolation 19
— smoothing 20
— resolvent 139
— adjoint 244
— selfadjoint 20
— linear bounded 1
— embedding 244
— trace 127
— measurement 1
— correct system 50
Optimal smoothing parameter 255
Orthogonal
— property 3, 4
— projector 20
— sum 51
— complement 51
Partition of unity 103
Plate 205
Projector
— optimal restoration 181
Representation
— analytical for D^m-splines 119
Residual
— function 225
Serie 238
Space
— Hilbert 1
— Banach 244
— Sobolev 244
— Hölder 57
— Euclidean 11
— intermediate 128
— multivariate of polynomial splines 106
— of continuous functions 12

— finite-dimensional 65
— null 20
— anisotropical 103
— semi-Hilbert 24
— n-variate of functions 103
— univariate finite-dimensional 103
Spline
— bicubic 169
— Bernully 37
— interpolating 1, 65
— smoothing 1
— mixed 5
— pseudo-interpolating 8, 65
— operator 20
— in subspace 64
— projector 18
— vector 147
— rational 155
— tensor 162, 174
— blending 177
— polynomial 105
— D^m in bounded domain 91
— D^m in $\mathbb{R}^n$ 117
— D^m on B-spline 103
— pair 16
— — maximal 17
— in convex set 224
— in thin layer 138
Support
— finite 106
Transform
— Fourier 245
— Haar 211
— Hadamard 221
— Walsh 221
Variational
— functional 4
